

SunSM Developer Network

Come for the information, stay for the interaction

Join the SunSM Developer Network (SDN) today and boost your programming productivity for everything from cell phones to servers. SDN offers timely and accurate access to technical information on JavaSM technologies and the SolarisSM Operating System (OS), as well as special access to invaluable communities, products, programs, and services that support the entire development life cycle. Sign up now, it's free!

Highlights

- Free! Simply register and become a member immediately. Join a worldwide community of JavaSM and SolarisSM developers.
- Access the latest software and tools for the Java and Solaris platforms.
- Become productive through tutorials, code samples, relevant sample applications, and best practices.
- Join forums and user groups, and take advantage of the wealth of technical experts who can provide assistance any time.
- Get answers from the experts through forums, technical tips, and bug databases.

Get software

Fuel productivity and get your work done more efficiently

- Tools: NetBeansSM, Java Studio Creator, Java Studio Enterprise, Sun Studio
- Java Software Development Kits for the Java 2 Platform, Standard Edition, Enterprise Edition, and Micro Edition, including the Wireless Toolkit
- Platforms: Java Enterprise System, Solaris OS
- Free evaluation of all software
- Early access to new software directly from our engineering teams

Leverage resources

Employ the platforms and technologies more successfully

- Code samples, code camps, and sample applications to help you get going on your next project
- Ability to architect your applications using Java BluePrints and best practices
- Members-only newsletters for first-hand information on technical developments
- Technical articles and tutorials for Java technologies and Solaris platforms
- Professional growth through case studies and certification programs
- Access to bug databases for faster problem determination
- Web-based training for timely access to tools and technology training

Enjoy community, get support

Soak up smart solutions from other developers and online support

- An inside track to the open source community via direct ties to Java.net, NetBeans.org, and OpenSolaris.org
- More than 700 Java technology, Solaris platform, and product user groups with 10,000-plus members providing person-to-person interaction in a rich community environment
- Hundreds of unique forums comprehensively covering virtually all aspects of Java and Solaris development
- Free access to interactive, multimedia technical sessions such as online chats and webinars
- Regional sites for international developers
- Connect with technology experts and other community members at the JavaOneSM and regional Sun Tech Days developer events
- Earn extra Duke Dollars in the SDN Rewards Program and redeem them for gifts from Sun

Find out more for yourself! Sign up for membership today at <http://developers.sun.com>.

Sharpen your edge!

The Sun Developer Network is part of an ongoing effort by Sun Microsystems to provide developers with the best resources for the Java and Solaris platforms. Membership is offered at two different levels. Compare the benefits and sign up today!

SDN Program Benefits	Open Access	SDN Membership (free)	SDN Subscriptions (fee varies)
Downloads of the latest SDKs, trial software and early access software	•	•	•
Productivity-enhancing code samples and tech tips	•	•	•
Informative documentation and articles	•	•	•
Educational tutorials, training guides	•	•	•
Newsletters with immediate access to the latest information on technologies and tools		•	•
Community forums for peer-directed programming solutions		•	•
Interactive online events that provide direct access to technical experts		•	•
Ongoing online access to conference and event technical content		•	•
User groups for networking and providing feedback on product direction		•	•
Recognition programs that help you earn points and prizes		•	•
Exclusive offers and discounts		•	•
Entrance to special SDN-only events		•	•
Free software upgrades and updates			•
Online technical support			•
Discussion forums monitored by support staff			•
Knowledge base data for convenient self-help at any time			•
Exclusive access to alpha builds of upcoming software releases			•

Ask about additional developer benefits:

- Sun software product user groups
- Training certification courses
- Contract and per-incident developer technical support
- Mobile application testing and Java Powered application certification
- Access to Sun's strategic partners, so you can take your application to market
